

Sariat Hossain

MERN Stack Developer

I am a skilled Full Stack Web Developer and Web Application specialist, proficient in both front-end and back-end development. With expertise in all stages of the development cycle, I excel at creating dynamic websites. My proficiency includes CSS3, Bootstrap, Tailwind CSS, JavaScript ES6, Node.js, Express.js, and utilizing libraries like React.js and Redux. I also have experience working with MongoDB and implementing MongoDB Aggregation for efficient data management.

Address

Cox's Bazar, Chattogram, Bangladesh.

Education

Diploma in Engineering (2019-2020)

Computer Science Technology

Cox's Bazar Polytechnic Institute,
Coxs Bazar.

Secondary School Certificate (2018)

Science

Md. Elias Mia Chy. High School,
Coxs Bazar.

Expertise

- JavaScript
- ReactJS
- Redux
- NodeJS
- ExpressJS
- MongoDB
- Bootstrap5
- Tailwind
- React Native
- Github
- Vercel
- Netlify

Language

English

Spanish

FINISHED PROJECT

Inventory Management Website

Demo : [Live Preview](#)

Client-Site : ReactJS, Redux, Bootstrap, REST API.

Server-Site : ExpressJS, JWT, MongoDB.

This inventory management website offers a comprehensive suite of features, including brand management, product tracking, customer data management, expense tracking, sales monitoring, purchase management, returns processing, and detailed reporting. With these tools, users can efficiently manage their inventory, sales, and overall business operations to optimize efficiency and profitability.

Task-Manager Website

Demo : [Live Preview](#)

Client-Site : ReactJS, Redux, Bootstrap, REST API.

Server-Site : ExpressJS, JWT, MongoDB.

This task management website empowers users with a range of features, including task creation, updates for new, completed, canceled, and in-progress tasks, as well as easy task deletion. With these capabilities, users can efficiently organize and track their tasks, ensuring streamlined workflows and increased productivity.

E-Commerce Website

Demo : [Live Preview](#)

Client-Site : ReactJS, Redux, Bootstrap, REST API.

Server-Site : ExpressJS, JWT, MongoDB.

This e-commerce website offers a user-friendly experience with features like adding items to the cart and seamless payment gateways (Mastercard and Paypal). Additionally, it provides easy access to order history. Administrators can efficiently manage categories by creating, updating, deleting, and reviewing them, as well as products with similar tasks. The website also offers search and filtering options for enhanced user convenience. Furthermore, administrators can track payment statuses (Not Processed, Processing, Shipped, Delivered, and Cancelled) for improved control and customer satisfaction.

Alumni Tracker App (College project as a team leader)

Demo : [Live Preview-APK](#)

Client-Site : React Native , REST API.

Server-Site : ExpressJS, JWT, MongoDB.

The alumni tracker app includes features such as searching for student and teacher accounts, retrieving students by department (Computer, Food, Civil, RAC, Tourism, Electrical), and providing admin functions to handle student requests, approvals, and administrative privileges. It efficiently manages alumni data, ensuring seamless tracking and interactions.
